University of Delhi
95th Annual Report
PREFACE

The University of Delhi is a premier university of the country. Since its establishment in 1922, it has maintained the highest academic standards and has established some of the best practices in higher education in the country. In line with its motto, *Nishtha Dhriti Satyam*, the University has continued to foster a long-term commitment to nation building and an unflinching adherence to universal human values. It is a pleasure and privilege to present the 95th Annual Report of the University, covering the period from April 1, 2017 to March 31, 2018.

The University has been ranked top most in the country by US News Global Top University Ranking (Washington Post). It was ranked in second position in the country by India Today and is 7th in the National Institutional Ranking Framework. The h-index of the University touched 164, one of the highest among Indian universities. The University received over Rs 280 crores of grants in 2017-18 from extramural sources with over 300 research projects underway during this period. The University has set up various innovation and entrepreneurship support programmes such as the Electropreneur Park and Design Innovation Centre.

It is a matter of deep satisfaction as also an immense pleasure to report that the University of Delhi achieved a significant distinction in terms of being recommended and ranked at number one spot among universities under the Institution of Eminence Scheme of the Ministry of Human Resource Development, Government of India. This is a recognition of the cumulative efforts and contribution of our students, researchers, teachers and the administrative staff. It is no ordinary fete by any standards as the competition for the limited number of institutions to be so recognised was most severe. Our stakeholders deserve to be congratulated for this accomplishment.

The University offers more than 500 programmes, which include undergraduate programmes, an array of postgraduate programmes (Masters, M.Phil. and Ph.D.), Certificate and Diploma courses. We have successfully implemented the Choice Based Credit System (CBCS) at the undergraduate level, offering a vibrant spectrum of skill-based programmes. The process of implementation of CBCS at the postgraduate level is nearing completion and the University shall be ready with the revised curriculum from the session 2019-20. The University has established new centres of learning such as the Delhi School of Journalism, the Delhi School of Transnational Affairs, and the Institute of Cyber Security and Law. The University continues to stress on qualitative initiatives such as the conduct of the Students' Experience Survey and Benchmarking exercises to assess and renew itself.

The University is expanding collaborations with international institutions and has launched a special drive to expand the induction of foreign students, thereby reaching out to the community extensively and foregrounding its cultural ideal of *Vasudhaiva Kutumbakam*. It has also adopted five villages under the aegis of the Unnat Bharat Abhiyan initiative of the MHRD and continues to undertake need based and participatory community development work in these communities.

Among the several important initiatives by the University, the one on sustainability deserves to be mentioned here. We have embarked on the path of sustainability aimed at reducing carbon footprint of our myriad actions and activities. Installation of solar power heaters in most student hostels, replacement of traditional light sources by LED lights, shifting to e-governance including online admissions and entrance tests are some of the important efforts in this direction. By migrating to the online admissions and online entrance tests, the University contributes to saving nearly 5000 trees annually – helping add a forest to the nation each year.

As an emerging leader in global education and research, it is the prerogative of the University of Delhi to contribute significantly to the intellectual growth of the country by serving around seven lakh students and faculty from across India and abroad.

Yogesh K. Tyagi
Vice Chancellor

QUALITY INITIATIVES

The University has initiated several quality initiatives for improving the quality of teaching and learning at the University. As a part of Internal Quality Assurance Cell of University of Delhi, Quality Improvement activities have been organised on a regular basis by each Department/Centre for Quality Enhancement.

Students' Experience Survey

The University has started taking classified feedback from the post graduate students through an innovative Students' Experience Survey conducted on an annual basis. In a recent survey, the average rating for all responses (across all Departments/Centres) for 'Overall Academic Experience' is much above average, i.e. between Good and Very Good. In a recent survey, across all respondents, 90% of the students acknowledged that they would recommend the University to others.

Benchmarking Exercise

The Benchmarking Exercise of the University is also a unique attempt of the University to create a viable means of self-assessment by the departments on all criteria that are contemporarily relevant for an institution of higher learning against global benchmarks and standards. This exercise has been conducted on an annual basis and has an inbuilt mechanism for self-correction. The Benchmarking Exercise has helped in devising Quality Benchmarks as Assessment Criteria of quality initiatives by each Department in the following ways:

- To identify the gaps between the current parameters of the departments compared against the best performers.
- To identify standards and performances and providing a road map for continuous quality improvement.
- To improve processes that are critical to the growth of the University.
- To establish goals and identify additional avenues for improvement. The exercise will also create a better understanding of global practices.
- To promote quantum leaps in performance, fostering excellence and breakthrough thinking and innovation.
- To identify more effective ways of improving performance.

In the current year DULS has conducted 15 Information Literacy Programs in Departments/Colleges and in Conference Centre. 555 students including P.G., Research Scholar & faculty members have attended the program.

Similarity Detection: The Central Library has been assigned the work of similarity detection for the research assignment submitted by students. Central Library has started similarity detection since December 2015 and a total of 3033 Ph.D Thesis and M.Phil Dissertations, and other research assignments have been verified.

Document Delivery Service: The J-Gate @UGC Infonet provides article-level access for all the databases subscribed by the UGC-INFONET Digital Library consortium, about 5,200 open access electronic journals, and print journals subscribed by 30 University libraries designed as Inter-Library Loan (ILL) Centers of the INFLIBNET Centre. The interface provides hyper link to articles that are available electronically and accessible in a given University so that a user can access and download articles. For articles from journals that are not available electronically or are not accessible in a given University, the interface facilitates semi-automatic generation of ILL request directly from user(s) to the INFLIBNET Centre or to one of the ILL Centre as the case may be. DULS is one of the 30 designated ILL Centers for the services.

Advantages of J-Gate@UGCInfonet include: Provides single window search option for all electronic databases and access to several journal articles which are made available online by 13,290 Publishers; Provides access to massive database of journal literature, indexed from 45,339 e-journals with links to full text at publisher sites; Provides access to about 23,410 open access e-journals in full text, having over 9,425,618 open access articles.

Availability of photocopies of print journal articles not available in DULS through Document delivery service.Utilize the Document delivery service by requesting other designated Universities to provide copy of the print journal articles.As a designated ILL Centre of J-Gate@UGCInfonet, DULS is also shouldering many responsibilities. In lieu of electronic databases available through UGC INFONET Digital Library Consortium, worth about INR 1,00,000, DULS shoulders the responsibility of supplying photocopies of the articles requested through J-Gate@UGCInfonet to the scholars throughout India. DULS being a large organization, having large collection of print and electronic information content mostly serves the information requirements of its users. Hence, there are very less requests for photocopies of the articles from DULS users to other Universities. However, as an ILL Centre, DULS is regularly supplying the photocopies of articles.

Human Resources: The training facility created in the Central Library for imparting training on 'Use of Computers in Libraries' has been conducting the training programme for the benefit of Library Staff of the University and College Libraries with the help of the resource Persons from DU Computer Centre.

Summer Internship: DULS continued to engage students of Master's Programme in the Library & Information Science as summer interns @ Rs. 7,500/- per month. 13 students have been given training in various Libraries during the period.

CENTRE FOR DETECTOR AND RELATED SOFTWARE TECHNOLOGY

Major Activities and Achievements

Centre was earlier involved in the major discovery of Higgs Boson in 2012 in the CMS Experiment at CERN, Geneva, Switzerland and in 2015-16 it continued its association with the CMS experiment. Multi-strip Si sensors, which are designed, developed and fabricated in collaboration with BEL, Bengaluru were characterized at KIT, Germany. These are state-of-the-art detectors and are developed almost for the first time in India. Centre is also gearing up to prepare for the certified Sensor Qualification Centre (SQC) for characterizing the silicon strip sensors for the Tracker Upgrade of the CMS Experiment.

CENTRE FOR ENVIRONMENTAL MANAGEMENT OF DEGRADED ECOSYSTEMS

Major Activities and Achievements

The thrust areas of the Centre include action research in addressing contemporary environmental and ecological challenges that are threatening ecosystems and quality of life and capacity building in action research. CEMDE has been active in the area of biological invasions. Contributed to the understanding of

mechanisms through which naturalized and/or nonnative plants achieve their competitive or general ecological success. Doctoral students of the Director are working on the invasion ecology of several exotic species. During 2017-18 the centre has undertaken the ecological restoration of mined out areas in coalfields of Coal India Limited in Dhanbad and Ranchi. The 4-year old restored sites harbour tropical deciduous forests/ecosystems. The centre has also developed a successful strategy for the management of *Lantana* – an invasive alien species – in protected areas.

CENTRE FOR GENETIC MANIPULATION OF CROP PLANTS

Major Activities and Achievements

The major activity of the Centre is to undertake research on genetic improvement of oilseed Brassicas through conventional and biotechnological approaches. The Centre was established in the year 1995. Major financial supports have come from the DBT in the form of two major projects. Earlier the Centre was funded by the National Dairy Development (NDDB) from 1996 to 2016. The primary objective of the Centre is to undertake research on molecular breeding in Brassicas for improvement in yield and quality and breeding for disease resistance. The programme is concentrating on development of hybrids through conventional and transgenic approaches. Some of achievements from the Centre have been two CMS-based hybrids (DMH-1 and DMH-4) which are under cultivation in the farmers’ field. One transgenic hybrid (DMH-11) has been cleared by GEAC and permission has granted to undertake demonstration trials. The programme has also developed canola quality and white rust resistant mustard lines by marker-assisted breeding. Presently genome sequencing of several important *B. juncea* lines is being done for developing SNP based breeding platform.

**CENTRE FOR INNOVATION IN INFECTIOUS DISEASE RESEARCH,
EDUCATION AND TRAINING**

Major Activities and Achievements

Centre for Innovation in Infectious Disease Research, Education, and Training (CIIDRET) established under the ordinance XV-A of the University of Delhi since October 2015 has received due approvals of the Academic Council and the Executive Council. As per its mandate, it has initiated several activities, which include interaction with college students of science stream to inspire them to take up research and Innovation as their career. CIIDRET has organised Industry-Academia Interaction through 'Entrepreneurship Guest Public Lecture Series', which includes lectures by Entrepreneurs and the facilitators of Innovation. CIIDRET has been providing state-of-the-art Proteomic and Genomic analytical facilities along with expert advice to scientists from both academia and Industry, and offers consultancy to the Biotech Industry. CIIDRET has organised Hands-on training courses covering different aspects of Genomics and Proteomics in collaboration with Industry Experts under the scheme 'Continuing Education and Skill Enhancement for Innovation in Biotechnology (CIIDRET-CESEIB).

CIIDRET has developed an ultra-large phage-displayed human antibody (scFv) library comprising of 10 billion clones by using proprietary cloning strategies, which have led to 100% recombinant clones with more than 70% in-frame full-length scFv molecule with sequences matching with germline sequences indicating the naïve-ness. This library has been successfully used for selecting binders to a clinically important human target protein, and the conversion of binders from scFv to Fab format retained the high binding specificity. This library will be useful for selecting therapeutic antibodies against various targets including snake venom as a cure for Snake bite, Antibiotic-resistant bacteria and their toxins that cause Sepsis etc.

Undergraduate Admissions (Merit Based) 2017-2018

DUCC was entrusted upon the responsibility to develop the online Registration Portal for UG Admissions (2017-18) including the college portal for admissions. DUCC successfully implemented the same within a limited period. Portal was designed as per the best practices in such a way that all the resources were fully utilized and hardly any downtime was observed and fully operational even on peak loads. Appropriate alerts were generated if the applicant was approved in some college and other college tries to admit him/her. More than 3 lakh applicants registered successfully, approx. 2.2 lakh Applicants successfully paid the Registration Fee, 1 lakh transaction handled of applicants who paid the admission fee. Categories wise evaluation and processing was fully automated, like Sports, PWD, Ward, NCWEB. Female Applicants from Delhi were automatically registered for NCWEB if they selected B.A. (Programme) or B.Com in regular stream.

Automated online collection of Registration and College Fee system was started. This includes all type of adjustment and re-calculations, i.e, Admission fee of the applicant adjusted automatically if he/she withdrawn from one college and took admission in other college, refund balance if paid extra amount etc. All the payments made by the Applicant were shown on the Dashboard of Applicant. API was developed for Minority colleges to verify if the fee is paid by applicant on admission portal.

Cut offs were taken online from colleges and were approved by Registrar's office online. Executive Summary was provided to each college for finalizing the cut off. Admission summary (Course Wise, Category Wise, cut off wise) was provided to college on its dashboard for ready reference.

INTER DISCIPLINARY CENTRE FOR PLANT GENOMICS

Major activities and achievements

In the past over 5 years, we have participated in sequencing of the wheat genome as part of an international consortium. In collaboration with two other groups based at IARI, New Delhi, and PAU, Ludhiana, we have sequenced Chromosome 2A of the hexaploid wheat, and specifically contributed BAC-end sequences of ca. 130,000 BACs that harbor 100-150 kb fragments of Chromosome 2A using Sanger's technology. The international consortium for assembling the genome of wheat has used these data. The assembled genome sequence will be of tremendous use to the scientific fraternity to map genes and use them for improving wheat for abiotic and biotic stress tolerance, increasing productivity and altering plant phenotype with better agronomic traits. Along with this work, we have continued our efforts to functionally characterize bZIP and F-box protein coding genes in rice for their role in light regulated plant development and abiotic stress tolerance.

FACULTY OF EDUCATION
DEPARTMENT OF EDUCATION

Major Activities and Achievements

Our first batches of the 2 year B Ed and M Ed programmes passed out in July, 2017. 89 students got their B.Ed. degree, 49 students got their M.Ed. degree. Likewise, 19 Scholars were awarded the M.Phil. degree in the course of the year and 12 scholars received their Ph.D. degrees in the University Convocation.

Under the aegis of the Institute of Advanced Studies scheme of the Dept. sponsored by the Ministry of Human Resource Development, our faculty organised national level conferences, seminars, symposia and workshops in which there was wide participation from students, scholars and academics from across the country. The themes included: Inclusive Pedagogy, Diversity, Art and Aesthetics, Issues in Plagiarism and citation in Research Writing, Language Education, Science Education, Mental Health, Comparative Education, Approaches to Educational Research, International Comparative Education, Teacher Education, Psychosocial Perspectives in Education and Films as a Pedagogic Tool. In addition, in-service teacher education workshops were conducted in Research Methods and Mathematics Education for DIET Educators and a workshop was organised for Mentor Teachers in Delhi Government Schools in Educational Management. The Department was also able to develop resource material in Foundations of Education and in some Pedagogic areas like Mathematics and Social Science Education for Elementary and Secondary Teacher Education Programmes for SCERT Delhi.

A very significant achievement has been the setting up of an Enabling Unit for students with disabilities. The aim of this unit is to facilitate the learning of students with disabilities. At present, we are addressing the needs of about 25 students, across courses and programmes of study. Besides assisting students in academics, the Unit also tries to generate awareness among youth and develop sensitivity towards issues related to persons with disabilities.

The Department stood **First** in the India Today Ratings of best institutions for studies in Education and also obtained a high rank in the NIRF ranking of Universities.

Our departmental website gives full details and information about all that we do. It is extremely user friendly and can also be accessed by visually challenged students. So anyone requiring more information about our programmes and activities can visit our website. Professor Avijit Pathak addressed the gathering at our Foundation Day. This year our website got a new web address <http://www.doe.du.ac.in> at par with other Departments of the University of Delhi to distinguish it from the colleges.

GENETICS

Major Activities and Achievements

The faculty members have made notable scientific contributions. Research work from Prof. A. K. Pradhan's group has developed some CMS-based and GM-based productive hybrids, several lines with improved quality and white rust resistance in mustard. Prof. B. K. Thelma's group has successfully completed the screening of 200,000 newborns for inborn errors of metabolism with collaborators from over 20 hospitals in Delhi state, and thereby generated the first ever epidemiological data in the country for these disorders. They have also discovered several novel genes and SNPs associated with neurodegenerative brain disorders and intellectual disabilities. Prof. M.V Rajam's recent work has led to the identification and characterization of around 17 novel genes vital for viral and fungal pathogenesis in tomato; and metamorphosis of insect pests of tomato, brinjal and cauliflower, and using RNAi-mediated silencing of these genes, they have demonstrated their potential for crop protection. Prof. P.K Burma's group has analysed tapetum specific promoter A9 from *Arabidopsis thaliana*, which led to the identification of transcription factors AtMYB80, AtMYB1 and AtMYB4 involved in positive and negative regulation of the promoter. Dr. S. Sarkar group has discovered several novel genetic suppressors to ameliorate the pathogenesis of human neuro-degenerative disorders and have also demonstrated the essential role(s) of *globin* gene in development. Dr. Jagreet Kaur's group have used set of geographically diverse *Arabidopsis* accessions (140 accessions) to uncover the genetic architecture underlying resistance to *Alternaria brassicae*, which can potentially help in developing resistant crops. Dr. Tapasya Srivastava's group have demonstrated a role of TET proteins in regulating cancer stem cell formation

of glioma cells in hypoxia, and established SNP rs16969968 as a strong predictor of nicotine dependence and lung cancer risk in our north Indian cohort, in complete contrast with those of Asian countries. The group have also established inhibin as a paracrine factor for metastasis and angiogenesis in ovarian cancer cells. Dr. Aruna Devi Naorem's group is working towards understanding the role of prolyl isomerization by Parvulins, and reported that PinA, a *D. discoideum* homolog of *S. cerevisiae* Ess1 is important for growth and development. Dr. Kaustuv Datta's group has identified a GTPase localized to the mitochondrial ribosomes that is likely to respond to changes in ATP/ADP ratio and regulate cells ability to carry out respiration. They have also identified a separate GTPase that aids in joining of large and small mitochondrial ribosomal subunits.

MICROBIOLOGY

Major Activities and Achievements

A point-of-care (POC) device for rapid detection of antimicrobial resistance (AMR) in bacteria is being developed. Three well-proven technologies *viz.* DNA extraction, hybridization with resistance-genes array and an algorithm-driven selection of appropriate antibiotics are being integrated into this device. The role of

the genomic elements flanking upstream and downstream regions of the genes conferring resistance to β -lactam and quinolone antibiotics in *E.coli* have been investigated to use these as markers to study epidemiology and spread of antibiotic resistant bacteria. The role of chromatin modifications in *Leishmania* is also a major area of research. The past year the focus has been on the importance of histone acetyltransferase HAT2 and the histone modification it brings about: H4K10 acetylation. HAT2 is found to regulate transcriptional events. During the course of investigations the presence of two tiers of transcriptional regulation in *Leishmania* was uncovered. The study will be taken genome-wide over the next two years. Investigations into the role of histone methylation events in *Leishmania* are now being initiated to elaborate the functional roles of specific histone methyltransferases in cellular growth, cell cycle, replication and transcription. The role of Hepatitis C Virus (HCV) Core protein in virus mediated tumorigenesis by modulation of cellular metastasis suppressor Nm23-H1 also studies which provided the role of HCV-Core in HCV mediated cancer metastasis. The molecular characterization of an extra sequence of gamma-glutamyl transpeptidase from *Bacillus atrophaeus* (BaGGT) is done to develop a catalytic efficient mutant with 2-fold enhanced activity. A hyperthermostable alkaline lipase from *Geobacillus thermoleovorans* was isolated. The lipase was heterologously expressed in *E.coli*. The expressed enzyme was purified and its biochemical and biophysical characterization revealed several key industrial useful properties. The large scale production of therapeutically important biomolecule like streptokinase and hTNF- α using heterologous expression system such as *E. coli* and *Pichia pastoris* is done. Bioprocess optimization resulted in a higher volumetric product yield of 3.4 g/l and 2.35 g/l respectively.

Major Activities and Achievements

Department of Microbiology at VP Chest Institute is actively involved in diagnostics, teaching and research. A number of diagnostics pertaining to Bacteriology, Anaerobic bacteriology, Mycobacteriology, Virology & Mycology are being carried out. Higher end facilities like gene-expert, MGIT, Gene sequencer and MALDI-TOFF are available for identifying the pathogens. Research in drug resistance profiling and molecular characterization and typing of bacterial pathogens including M. tuberculosis isolates, Ethambutol resistance mechanisms, role of efflux pumps in drug resistance of M. tuberculosis, newer diagnostic techniques are actively pursued. Study on drug resistance to various fungal pathogens and the Environmental fungi were also studied. Virology is actively involved in influenza virus diagnostics and viral research. Major focus of laboratory is antiviral research and Vaccines development against influenza and chikungunya virus. About 3747 (Bacteriology), 973 (Serology), 91 (Anaerobic), 10,000 (Mycobacteriology), 4906 (Mycology), 76(Virology) clinical specimens were processed in the routine diagnostic laboratory.

OBSTETRICS & GYNAECOLOGY (UCMS)

Major activities and achievements

Department of Obstetrics & Gynecology, UCMS & GTB Hospital is academically active despite heavy clinical load of running a 325 bedded department with a daily OPD attendance of 500-600 patients and delivery rate close to 20,000 per year. Despite this, the department has to its credit several publications in peer reviewed indexed journals. The department is actively involved in National programmes namely JSY, JSSK, Thalassaemia screening programme, PPTCT, PMSMY, LaQshaya and CAB. It regularly holds CMEs & Workshops for updating knowledge and skills of gynecologists. This year the office of AOGD was held by our Department and numerous academic and social activities were held under its banner. Faculty and residents have received several awards and prizes in various national conferences for best paper and poster presentations. The prestigious R.D. Pandit award for best thesis writing in Obstetrics and Gynaecology (awarded by FOGSI) has been won consecutively fifteen times by this department including year 2017-18.

Faculty strength -11

PATHOLOGY (UCMS)

The Department is striving to attain excellence in undergraduate and postgraduate teaching. PG's are encouraged to undertake research, participate in conferences and present scientific papers. The faculty members are engaged in active research. To ensure adequate patient care, several new tests have been added. The turnaround time for reporting is short thus facilitating diagnosis and ensuring prompt treatment. The medical and nonteaching staff work together to make this possible.

RADIODIAGNOSIS (LHMC)

Major Activities and Achievements

The department carries out clinical as well as research work. The strengths include the guidance by experienced senior faculty and a harmonious working environment that is founded on team-work. Research work is carried out in the form of thesis allotted to all MD students. Our students learn practical aspects of Radiology as they are exposed to a wide diversity of clinical cases, especially pediatric cases. This year, our department was involved in the organization of a conference on 'Delhi Imaging Update 2018' the Annual Conference of Delhi State Chapter of Indian Radiological and Imaging Association (IRIA) (February 23-25, 2018). This was a good learning opportunity for students, as well as participating delegates. Our students also attended various other conferences, and presented papers or posters. The faculty was actively involved in teaching activities, and took lectures at various conferences.

BOTANY

Major Activities and Achievement

The Department of Botany conducts teaching and research in a range of core and interdisciplinary areas of plant biology. In 2017-18, major leads were obtained on utilization of nanoparticles as nano-drug formulations with antimicrobial properties and for degradation of azo dyes-contaminated laboratory wastewater using Seabuckthorn, an under-utilized Himalayan bioresource and novel Brassica varieties. Impact of polyploidization was studied on regulatory regions of *Brassica* sp. and a novel rapid method for transient analysis of promoters was developed. Various strains of phosphate solubilizing bacteria from agricultural soils of Delhi were isolated and the phosphate solubilizing efficiency of the isolates was estimated. Green synthesis of nanoparticles using herbal extracts, their characterization and efficacy against different cancer cell lines and mosquito vectors were conducted. Assessment of populations of *Rhododendron arboreum* in the Himalayan region at different altitudes and effect of anthropogenic activities was done. Association mapping for important agronomic traits in safflower, an important drought resistant oilseed crop with nutritious and healthy edible oil was done. Isolation and validation of gender specific markers in seabuckthorn, genetic diversity studies in various plants of economic importance (including endangered herbs) and development of mapping populations and polymorphic markers for apomixis was also accomplished.

ENVIRONMENTAL STUDIES

Major Activities and Achievements

The Department is engaged in teaching and research in the field of environmental studies. Each year, we admit 54 students from varied academic backgrounds straddling various disciplines to two post-graduate courses (M.Sc.- 31 & M.A.- 23) through an All India Entrance Test. Our faculty is engaged in frontline areas of research across basic ecological, environmental and applied environmental sciences. We also undertake research in socially relevant areas related to national development and contribute to resolution of issues arising from environmental degradation. Faculty members regularly publish their research findings in top-tier peer-reviewed journals viz., Nature, Science, and other high-impact journals. We have also secured extramural research grants, which are used in developing state-of-the-art laboratories and for training research scholars. Our faculty members are recognized world leaders in their fields. They widely collaborate with international experts and are regularly invited to share their findings through keynote/plenary lectures at National and International forums.

POLITICAL SCIENCE

Major Activities and Achievements

The Department was established in 1952, with about 40 postgraduate students. Since then the combined strength of students has exceeded to around 1000.

The teaching and research program of the Department is based on a comprehensive social science approach that integrates and interrogates sociological, economic, philosophical and cultural dimensions. It encourages a comprehensive study of the field of politics, keeping especially the Indian realities in focus.

The Department of Political Science has been attempting to de-centre the notions and practices of the political from its conventional moorings in Eurocentric thought and history. While engaged in moving away in its research agenda from dominantly European models for some time now, the Department has also insisted on learning and undertaking research on western thought and institutions as well, so that the mutual-imbrication of Europe and the non-West, especially India, may be studied more seriously. The relationships of exchange as well as asymmetry between the West and the non-West is of course critical to understanding the current thrust area of our Department, namely that of democracy, norms and institutions. The need for research on this area is intensified by a number of important global challenges that require more democratic initiatives than are currently available; and these have to be thought in terms of both national and extra-national institutions. Work on the thrust area also benefits from the critical investigations that we conduct in Indian Politics that reveal both new and old forms of (among other things) inequality, justice, discrimination and institutional processes in the larger context of the global.

Our general focus has been supplemented by a growing emphasis on the need to combine theory with ethnographic and archival work. We believe that it is necessary to acquaint ourselves with both Western Political Theory and Indian Political Thought in order to address and open out new empirical material to fresh questions. We are convinced that this will illuminate the unfolding reality of India and other countries\regions and also open out new research agendas for other institutions outside in and India.

The Department is extremely rich in academic potential, comprising a faculty known widely for their research and teaching abilities. It has entered into many collaborations with international institutions and its reputation is being rapidly consolidated within and outside the country.

Other Significant Information:

The various societies in our college are another kind of performative platform for the students. Societies such as the Women's Development Cell play an important role in the idea of 'un-learning', that is, rejecting indoctrinated and regressive thought-patterns. This is achieved through seminars and panel discussions on gender politics but equally through creative and experimental forum such as plays put up by the students. What is also worth a mention is how the work of separate committees often finds a meeting point. 'Navrang', our Dramatics Society, reinforces the same idea of protest against social inequity through innovatively designed performances. Recently, in fact, sounds of robust and bold self-expression rang through the college as an inter-college Nukkad Natak competition was held in the lawns of the institution. This is in sync with our efforts to move the teaching-learning process out of the classroom and to tap to the full other critical and incisive forms of expression.
